AMENDMENTS TO THE CLAIMS

Claim 1. (Cancelled)

Claim 2. (Previously Presented)

A tissue container according to claim 7, wherein the auxiliary compartment is attached to, integral with, or loosely received within the container.

Claim 3. (Previously Presented)

A tissue container according to claim 7, wherein the tissue receiving enclosure holds a plurality of moistened tissues and where the opening is fitted with a dispenser for dispensing one tissue at a time.

Claim 4. (Original)

A tissue container according to claim 3, wherein the auxiliary compartment is integral with or attached to the dispenser.

Claims 5 - 6. (Cancelled)

Claim 7. (Previously Presented)

A tissue container comprising a tissue receiving enclosure and a re-closable tissue dispensing opening for dispensing tissues therethrough, and an associated recloseable auxiliary compartment holding a preparation for use in conjunction with the tissues, wherein said tissue dispensing opening is fitted with a re-closable first lid, and wherein the auxiliary compartment is fitted with a re-closable second lid that is pivotally hinged to the first lid.

Claim 8. (Previously Presented)

A tissue container according to claim 7, wherein the first lid and the second lid are hinged to the dispenser about pivot hinges that extend parallel to each other .

Claim 9. (Original)

A tissue container according to claim 8, wherein the first lid and the second lid are hinged to the dispenser adjacent opposite edges of the dispenser.

Claim 10. (Cancelled)

Claim 11. (Previously Presented)

A tissue container according to claim 7, wherein the auxiliary compartment is formed in said first lid and is re-closable by a detachable cover.

Claim 12. (Cancelled)

Claim 13. (Original)

A tissue container according to claim 11, wherein the auxiliary compartment is formed at an outside face of the first lid.

Claims 14-18. (Cancelled)

Claim 19. (Previously Presented)

A tissue container according to claim 7, wherein one or both of the first lid and the second lid are biased to spring-open.

Claim 20. (Previously Presented)

A tissue container according to claim 7, wherein one or both of the first lid and the second lid are fitted with a snap-type closing mechanism.

Claim 21. (Previously Presented)

A tissue container according to claim 7, wherein one or both of the tissue dispensing opening and the auxiliary compartment are pre-sealed with a foil.

Claims 22-26. (Cancelled)

Claim 27. (Previously Presented)

A tissue container according to claim 7, wherein the container is a soft-pack.

Claim 28. (Previously Presented)

A tissue container according to claim 7, wherein the container is rigid.

Claim 29. (Previously Presented)

A tissue container according to claim 7, wherein the container is portable.

Claim 30. (Cancelled)

Claim 45. (Previously Presented)

A tissue container according to claim 7, wherein said second opening is closeable at least when said first lid is in the open position.

Claim 46. (Previously Presented)

A tissue container according to claim 7, wherein said second opening is closeable when said first lid is in the closed position.

Claim 47. (Previously Presented)

A cover according to claim 7, wherein said preparation comprises a liquid or topical ointment, oil, salve, moisturizer, anti-bacterial composition, rubbing alcohol, perfume, cleanser or powdered material for hygienic, medical, cosmetic, cleaning or surface treatment use.

Claim 48. (Cancelled)

Claim 49. (Currently Amended)

A tissue container according to claim 48, further comprising:

(i) a tissue receiving enclosure and a first tissue dispensing opening for dispensing tissues therethrough, said first opening being closeable by a hinged first lid;

(ii) at least one auxiliary compartment associated with one of said first opening and said first lid;

(iii) said auxiliary compartment containing therein a preparation for use in conjunction with

tissues, and

a cover formed with a tissue dispensing opening and at least one receptacle constituting the at least one auxiliary compartment, wherein said first lid is re-closable and formed with said cover.

Claim 50. (Previously Presented)

A dispensing cover for use with a tissue container, comprising:-

(a) a base portion adapted for attachment to a said container and having a first tissue dispensing opening;

(b) a first lid hingedly pivoted with respect to said base and being displaceable between a closed position and an open position with respect to said first opening;

(c) at least one auxiliary compartment adapted for containing therein a preparation for use in conjunction with tissues, said at least one auxiliary compartment comprising a recloseable second opening that is closeable at least when said first lid is in the open position.

Claim 51. (Previously Presented)

A cover according to claim 50, wherein the at least one auxiliary compartment is integral with or attached to the cover.

Claim 52. (Previously Presented)

A cover according to claim 50, wherein the at least one auxiliary compartment is formed in said first lid.

A cover according to claim 52, wherein the at least one auxiliary compartment is formed at an outside face of said first lid.

Claim 54. (Previously Presented)

A cover according to claim 31, wherein the at least one auxiliary compartment is comprised in said first lid, and said second lid is pivotably hinged to said first lid.

Claim 55. (Previously Presented)

A cover according to claim 31, wherein the first lid and the second lid are hinged to the dispenser about pivot hinges that extend parallel to each other.

Claim 56. (Previously Presented)

A cover according to claim 55, wherein the first lid and the second lid are hinged with respect to the cover adjacent opposite edges of the cover.

Claim 57. (Previously Presented)

A cover according to claim 50, wherein said second opening is closeable when said first lid is in the closed position.

Claim 58 (Previously Presented)

A cover according to claim 50, wherein said at least one auxiliary compartment contains a suitable preparation.
